

AMENDMENTS TO THE SPECIFICATION

Please amend in the Description of the Related Art, page 1,  
lines 12 through 19, to read:

In a conventional injection blow molding device in the  
related art, an injection mold and a blow mold which use a lip  
mold in common (alternatively, referred to as a neck mold) are  
provided and the outside surface, which is brought into contact  
with the molds, of the lip mold is formed in a tapered surface and  
the lip mold can clamp both of the injection mold and the blow  
mold. ~~(for example, see patent document 1)~~

~~{Patent document 1}~~ (see JP-A 2000-43128 (Fig. 1, Fig. 2)
